

En Passant

Homework Help

Question 1:

The White Pawn must move up three squares (usually this can be done in 2 moves since the Pawn can move 2 squares on its first move) in order to be able to En Passant properly.

Question 2:

It's the same situation for Black as well.

Question 3:

As we say in Chess, if you are going to En Passant, you must do it right away.

Diagram 1:

Right now, there is only one Pawn available for White to move onto the 5th rank.
